

WEBSITE GO-LIVE PROGRESS REPORT

Migration complete | Remaining work before domain cutover

Prepared for the Taunet Nelel Committee

Report date: 30 July 2026 (Rev B - evening update)

Organisation: Taunet Nelel Incorporated - Victoria

Replaces: Website Migration Status Report (28 July 2026)

Executive snapshot

- WordPress public-site migration is complete on Vercel + Supabase
- Live preview: <https://taunetnelel.vercel.app>
- 540 member records imported (assoc / welfare / both)
- Members auth, dashboard, announcements, resources, profile save - LIVE
- Events (10) and sponsors (12) loaded from Supabase
- Newsletter signups save to Supabase; Admin can export CSV
- DNS cutover NOT done - www.taunetnelel.org still on WordPress
- NEXT: Custom SMTP (Resend) so bulk member invites can proceed

Motto: "Together We Stand, Divided We Fall."

1. Migration phase - COMPLETE

The WordPress public website has been rebuilt and connected to the new platform. The committee can treat the migration itself as finished. What remains is go-live readiness (custom email, member access at scale, payments decision, and domain cutover).

1.1 Public website (Vercel)

- Live clone: <https://taunetnelel.vercel.app>
- Public pages rebuilt as modern HTML from the WordPress public site
- Gallery curated (Most recent / Past events); leadership photos kept on About
- Forms (Contact, Membership, Sponsorship, Welfare, Events) save to Supabase
- Contact newsletter signup writes to newsletter_subscribers

1.2 Platform foundation (Supabase)

- Project connected; schema and security migrations applied
- Tables in use: form_submissions, profiles, member_imports, events, sponsors, gallery, newsletter_subscribers, announcements, member_resources
- Association membership and Welfare membership kept separate in data model

1.3 Backups retained

- Full WordPress .wppress public-site backup retained locally
- Migration data pack under backups/migration-ready/
- WordPress kept online as rollback until after domain cutover

2. Delivered for go-live (current)

2.1 Members area

- Unified Members page: Sign in / Join / Committee tabs
- Supabase Auth wired for member login and registration
- Dashboard announcements card (committee can publish from Admin)
- Member Resources library (handbook, language, culture pages + DB list)
- Profile edits save to Supabase profiles when signed in
- Welfare registration path and welfare gate behaviour fixed
- BuddyBoss social features (feed, groups, forums, chat) intentionally deferred

2.2 Member records

Metric	Count / note
Member import rows loaded	540
Association only	205
Welfare only	22
Both association + welfare	313
Invite emails (test batch)	5 sent successfully
Bulk invites	Paused - waiting on custom SMTP

2.3 Committee admin

- PIN-secured admin portal at /admin/ (separate from member login)
- Live overview: enquiries, members (association / welfare filters)
- Events seed button, sponsors, gallery toggles, newsletter CSV export
- Announcements publish form for the members dashboard

2.4 Public / member content from database

Item	Status
Published events in Supabase	Done - 10 events seeded
Published sponsors in Supabase	Done - 12 sponsors
Newsletter capture + Admin CSV export	Done (campaign tool still separate)
Announcements + member resources	Done - seeded and wired on site
Gallery	Curated static albums; Supabase enrich available

3. Current systems map

System	URL / status
New public site (Vercel)	https://taunetnelel.vercel.app - LIVE preview
Current public WordPress	https://www.taunetnelel.org - still live (DNS not cut over)
New members area	taunetnelel.vercel.app/members/auth.html - LIVE
Committee admin	taunetnelel.vercel.app/admin/ - LIVE (PIN)
BuddyBoss portal (old)	https://portal.taunetnelel.org - not the new primary
ClientClub / GHL portal	https://members.taunetnelel.org - legacy broadcasts
Supabase	Connected - forms, auth, members, events, sponsors, newsletter

4. Remaining before go-live

These items are intentionally after migration. They should be finished before pointing www.taunetnelel.org at Vercel.

Item	Status	Owner note
Custom email / SMTP	NEXT	Resend + Supabase SMTP guide ready; needed before bulk invites
Bulk member access (~540)	Paused	5 test invites done; batch after SMTP is verified
Online payments	Not done	Membership / welfare / event fees still offline or external
BuddyBoss social rebuild	Deferred	Not required for go-live; core portal features already live
Marketing newsletter sends	Optional	Signups captured; export CSV to Brevo / MailerLite / Resend when ready
DNS cutover	Last step	Point www.taunetnelel.org to Vercel after UAT sign-off
Retire WordPress / old portals	After go-live	Keep 2-4 weeks rollback window

SMTP setup guide for the technical lead: [docs/supabase/CUSTOM-SMTP-SETUP.md](#) (Resend recommended: verify taunetnelel.org DNS, enable Supabase custom SMTP, raise rate limits, send 1 test invite).

5. Recommended sequence to go-live

Step 1 - Custom SMTP (NOW)

- Create Resend account and verify taunetnelel.org (DNS records)
- Enable Custom SMTP in Supabase Auth (smtp.resend.com:465)
- Raise Auth email rate limits; send 1 test invite to a committee inbox

Step 2 - Member access at scale

- Batch invites (e.g. 50 at a time) or self-register with list emails
- Keep association and welfare membership flags correct
- Committee smoke-test: sign in, dashboard, announcements, resources, welfare

Step 3 - Payments decision

- Agree payment provider path (or keep bank transfer for launch)
- Document fees on membership / welfare pages (already shown publicly)

Step 4 - Committee UAT sign-off

- Test forms, gallery, events, sponsors, login, admin on Vercel
- Mobile and desktop smoke test
- Written approval before DNS change

Step 5 - Domain cutover

- Point www.taunetnelel.org to Vercel
- Keep WordPress available as rollback for 2-4 weeks

Step 6 - Decommission old systems

- Retire WordPress public hosting when stable
- Retire BuddyBoss / ClientClub only after members have adopted the new portal

6. Gallery note (unchanged)

Event Photos remains curated on the new site (6 albums / 38 on-site photos). Gala 2026 full photographer set (1,400+) stays on Pixieset with a 24-photo preview on the site. Leadership portraits stay on About / Meet Our Team.

Committee decision requested

- 1) Note that migration and core portal go-live features are complete.
- 2) Approve proceeding immediately to custom SMTP (Resend) and then bulk member access.
- 3) Confirm DNS cutover only after committee UAT sign-off (www.taunetnelel.org remains on WordPress until then).
