

Original Site vs Vercel Clone

UI Gap Report

What exists on the live WordPress site but is not on the Vercel rebuild
(excluding deliberate redesign changes)

Prepared: 01 August 2026

Original (live): <https://www.taunetnelel.org/>

Clone (Vercel): <https://taunetnelel.vercel.app/>

Organisation: Taunet Nelel - Victoria

1. Purpose

This report compares the original Taunet Nelel WordPress website with the static Vercel rebuild. It lists content and features that appear to be missing from the clone, while excluding changes that were made deliberately (new layout, merged pages, added sections, and the new members area).

2. Gaps still missing on Vercel

1. Site search - The original has a header search box ("Search ..."). The Vercel site has no site-wide search.
2. Google Analytics / Tag Manager - The original loads Google tag ID GT-KV6C4FXF. The Vercel site does not include equivalent tracking. Analytics will not continue after cutover unless this is added.
3. Visible "DONATE" CTA - RESOLVED: Vercel header now has a Donate button linking to [sponsorship.html](#) (same destination as the original top-bar DONATE).
4. Member login destination - Original LOG IN goes to <https://members.taunetnelel.org/> (separate members subdomain). Vercel uses [members/login.html](#) on the same site. If the old members portal still has live features (payments, welfare claims, documents, etc.), those may not yet be fully mirrored on Vercel.

3. Recommended follow-up for the gaps

- Add site search (simple page index search, or later Supabase/content search).
- Add Google Analytics / Tag Manager (reuse GT-KV6C4FXF or a new GA4 property).
- Optionally restore a Donate CTA that links to Sponsorship or a future donation flow.
- Audit [members.taunetnelel.org](#) and list any live member features that still need rebuilding on Vercel + Supabase.

4. Not missing (deliberate or already covered)

These differences were treated as intentional redesign or already covered on Vercel:

- Separate Culture / Language / Women / Men / Youth / Sports / Mental Health pages on WordPress -> merged into [community.html](#) on Vercel (core content largely present).
- Separate [/team/](#) page -> [about.html#team](#) (team cards present).
- No public Contact page on original nav -> Contact page added on Vercel.
- No Business Hub on original -> Business Hub added on Vercel.

- Original social mainly Facebook/Instagram -> Vercel also includes TikTok, YouTube, and WhatsApp.
- Rich original home (membership plans, events blurb, sponsorship CTA) -> simplified home with section link grid on Vercel.
- Header / footer / hero visual redesign on Vercel.
- Welfare elevated to top-level navigation on Vercel.
- New members area on Vercel replacing the old WordPress-style login entry point (structure deliberate; feature parity still to confirm).

5. Page coverage summary

Main public areas present on both sides (with different structure where noted):

- Home
- About / Team
- Events
- Gallery
- Community programs (Culture, Language, Mental Health, Women, Men, Youth, Sports)
- Welfare
- Membership (including Basic \$50 and Welfare Plus \$300)
- Sponsorship
- Privacy Policy and Terms & Conditions
- Member Login / Join Us (different destinations; see gap 4 above)

6. Bottom line

Core pages are covered on the Vercel rebuild. The real omissions to put back before or during cutover are:

1. Site search
2. Analytics / Tag Manager
3. Optional Donate CTA (currently maps to Sponsorship on the original site)
4. Confirmation that anything still live on members.taunetnelel.org is rebuilt on Vercel

Everything else reviewed in this pass falls under deliberate redesign or is already represented on the Vercel site.
